			ART UNIT	PAPER NUMBER
			3729	
			DATE MAILED: 04/08/2005	

Please find below and/or attached an Office communication concerning this application or proceeding.

2) Notice of Draftsperson's Patent Drawing Review (PTO-948)

Paper No(s)/Mail Date 12/4/2003.

3) X Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)

Paper No(s)/Mail Date.

6) Other:

5) Notice of Informal Patent Application (PTO-152)

Application/Control Number: 10/716,184

Art Unit: 3729

DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed 01/25/2005 has been fully considered and make of record.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 55 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Tanaka et al (US 5,945,019).

As applied to claim 1, Tanaka et al disclose a method for conductively connecting first and second electrical conductors, the method comprising the step of: bringing the ends of the first (1, Fig. 1) and second conductors (2) into mechanical contact with each other in an overlapping position, the first and second conductors being composed of different materials (see Fig. 1), connecting the first and second conductors to each other by welding without feeding of additional welding material (see 3, lines 61-67 and column 4, lines 115); and mechanically forming the overlapping area to achieve a smooth width transition between the first and second conductors (see sequence Fig. 2A-2C).

As applied to claim 10, Tanaka et al disclose the first and second conductors have different diameters (see column 3, lines 64-67).

Application/Control Number: 10/716,184

Art Unit: 3729

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Tanaka et al in view of Ketchpel (US 4,255,613).

Regarding to claim 11, Tanak et al disclose substantial all limitations of the claimed invention except the step forming a resistance conductor for heating cables with a copper conductor.

However, Ketchpel teaches a resistance conductor for heating cables with a copper conductor (see column 4, lines 19-23). It would have been obvious to one of ordinary skill in the art at this time the invention was made to modify the Tanaka et al method by utilizing a resistance conductor with a copper conductor, as taught by Ketchpel, to provide a new and improved interconnect for electronic circuit (see column 1, lines 30-31).

Allowable Subject Matter

5. Claims 2-5 and 7-9 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/716,184

Art Unit: 3729

Response to Arguments

6. Applicant's arguments with respect to claims 1-11 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tai Van Nguyen whose telephone number is 571-272-4567. The examiner can normally be reached on M-F (7:30 A.M - 4:30 P.M).

Application/Control Number: 10/716,184

Art Unit: 3729

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Peter Vo can be reached on 571-272-4690. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
